

Hasan Solak

Turkey, İstanbul, Kağıthane, Türkiye | hasan23solak@gmail.com | 05525490135

Frontend Engineer with 3+ years of experience specializing in React and TypeScript. Passionate about bridging the gap between elegant UI design and robust full-stack architecture to create scalable, user-centric products.

Profile

Frontend Developer specializing in React and Typescript with hands-on experience delivering production web applications. At Kobil, I lead front-end release management and engineered core features that improved user experience and met international client requirements; I also reduce technical debt through targeted refactors to boost performance and maintainability. Collaborative team player skilled in modern front-end tooling (Redux, React-Query, Jest, Webpack) and committed to building scalable, user-focused interfaces.

Professional Experience

Frontend Developer, Kobil, İstanbul / Hybrid

Apr 2024 to Present

- Led front-end release management and versioning strategy for the product
- Engineered core product features using *React* and *TypeScript*, resulting in improved user experience and meeting strict international client requirements.
- Optimized legacy code via strategic refactoring, reducing technical debt and improving app load times.
- Contributed to multiple projects concurrently while maintaining high code quality and meeting rigorous project milestones.

Frontend Developer Intern, Düğün.com, İstanbul / Hybrid

May 2023 to Mar 2024

- Collaborated with senior engineers to implement scalable component architecture and frontend best practices
- Developed user-facing features for the core platform using *React* and *TypeScript*
- Built and maintained two independent side projects using *Vue.js* and *React*
- Optimized frontend build performance using *Webpack*

Frontend Developer Intern, Vatansoft, İstanbul, Hybrid

Jul 2022 to Oct 2022

- Contributed to the development of an accounting management web application using *React* and *TypeScript*
- Implemented new frontend features and resolved bugs to improve usability and system stability
- Collaborated closely with frontend and backend teams to deliver integrated solutions
- Communicated with key stakeholders to clarify requirements and ensure alignment with business needs

Education

Boğaziçi University, İstanbul

Management Information Systems, 2019 to Jun 2026

- **BUCHAIN (Blockchain Society):** Core Developer for the official website; collaborated in an agile-driven environment to architect and maintain the society's primary digital platform.
- **Cross-Functional Leadership:** Leveraged MIS background to be a part of academic and extracurricular projects, rotating through roles as *developer, business analyst, qa, and product manager* to ensure end-to-end project success.

Areas of Expertise

Html, Css, Bootstrap, Tailwind, Material UI, Javascript, Typescript, React.js, React Native, Redux, Redux Saga, React Context, React-Query, Node.js, Socket.io, MongoDB, Firebase, Jest, React Testing Library

Technical Proficiencies

Full-stack:	Proficient in modern backend technologies in addition to frontend development
Problem-solving:	Strong analytical skills and a proactive approach to taking on responsibility
Communication:	Communicate effectively in English and collaborate in international environments
Hands-on experience:	In React and TypeScript, with additional experience in supporting technologies and libraries
